

Ostrava, August 06, 2024

**Statement of the Management Boards  
of LUMEL S.A. in Zielona Góra and MICROSYS, spol. s r.o. in Ostrava  
regarding the acquisition by LUMEL S.A.  
of 100% of shares in MICROSYS, spol. s r.o.**

On August 6, 2024, LUMEL S.A. acquired 100% of shares in MICROSYS, spol. s r.o., whose main business activity is the development and sale of PROMOTIC software together with services.

The system PROMOTIC represents a modern SCADA software. It is used to build automation systems. It makes possible visualization, reporting and archiving of processes. Prepared reports can be published on the website, allowing access to information via the Internet.

With regard to the extensive experience of both companies in the segment of dedicated industrial automation systems and strategic development plans, the Management Board of LUMEL S.A. considers the acquisition of 100% of shares of MICROSYS, spol. s r.o. as a step that will allow for the best use of new opportunities and the potential for development and market expansion of both companies.

The well-known and recognized on the European market, the LUMEL brand which is a part of the RISHABH Capital Group, will take care of the organization and sale of software in the form of dedicated applications, thus providing the highest class solution (products + software) to current customers and ensuring product development to the potential users around the world. Work on software development will be carried out at the plant in Ostrava, Czech Republic, in cooperation with the development department of LUMEL S.A.

MICROSYS, spol. s r.o. will focus its activities on software development and, together with LUMEL S.A., will conduct activities in the field of sales and service and, in the future, building the LUMEL brand on the Czech market.

*"I am extremely pleased with the agreement we have concluded with MICROSYS, our business partner since 2021. Modern industrial systems cannot operate efficiently and effectively without the right software. It is just as important as the devices used. Therefore, LUMEL's products and PROMOTIC's software will be the perfect answer to the market's needs in terms of intelligent and user-friendly solutions for monitoring and optimizing, e.g. media, food processing processes, pro-ecological projects or telemetry and control systems.*

*And LUMEL, together with other companies belonging to the RISHABH group, has access to the global market to sell and service comprehensive solutions.*

*This acquisition is also in line with the long-term development strategy of LUMEL and our capital group.*

*And although I realize that the time in the world for business and for all of us is not the easiest, we will continue to make strategic decisions that affect the long-term development of the business,"* said **Dinesh Musalekar** - President of LUMEL S.A. and LUMEL ALUCAST Sp. z o.o. and CEO of the Rishabh Capital Group.

*"Our company has been developing the PROMOTIC SCADA system for over 30 years. The PROMOTIC system provides flexible software solution for a wide range of industrial automation applications.*

*The MICROSYS company has so far been active mainly in the Czech and Slovak Republics and in Poland. In order to expand our sales opportunities to other regions worldwide, we have been looking for a strong partner to whom we can offer our software and who will take full advantage of the wide possibilities of the PROMOTIC system.*

*I am therefore very happy that we have found a reliable partner that can help us grow in the future. In the union with LUMEL, we see a unique opportunity for implementing specific SCADA solutions for end customers and at the same time to further develop the PROMOTIC SCADA system platform itself."* said **Zdeněk Malina**, Managing Director of MICROSYS, spol. s r.o.

The LUMEL brand has been known worldwide since 1953 for producing the highest quality measuring equipment and high-pressure castings. It has achieved its high position on the market due to its consistent implementation of development policy, employee competences and use of modern means of design, production and research techniques. It provides comprehensive solutions for the energy and industrial automation sectors as well as the automotive, chemical, metallurgical, HVAC and food industries. LUMEL S.A. is a manufacturer of industrial automation devices for measuring, processing, regulating, recording and transmitting and visualizing industrial processes, services in the field of design and implementation of automation systems, EMS services, technical consulting.

The company MICROSYS, spol. s r.o. was founded in 1991 by a group of employees with several years of experience in the field of production and application of software systems for monitoring and control of technological processes.

It focuses its activity at the production of the PROMOTIC visualization system (SCADA) and the implementation of applications in the field of industrial automation.
